Subject: AM Broadcast Tower Question

Well, from personal experience with a friend who lives near
such an installation, you can pick up the AM signal on some
cheap telephones.

Toasters? I think you would have to be really close to the
station for that to happen less than say 1/4 mile (this is a
guesstimate).

From ARRL Headquarters
Newington CT November 3, 1994
To all radio amateurs

SB DX ARL ARLD065
ARLD065 DX news

The items in this week's bulletin are courtesy of Kirsti, VK9NL, the HIDXA, Chod, VP2ML, The DX Bulletin, Bob, W5KNE, QRZ DX, the Yankee Clipper Contest Club PacketCluster network and the Contest Corral column in QST. Thanks.

BHUTAN. Despite poor propagation conditions, a successful demonstration of Amateur Radio was carried out today for the Deputy Minister of Communications and staff. Jim Smith, VK9NS, reports that A51MOC is now the official call sign of the Ministry of Communications.

PACIFIC TRIP POSTPONED. Masa, JE1DXC, has run into transportation problems. His trip that included stops at 3D2, T2 and T30 has been postponed with no rescheduling date mentioned.

ANTIGUA. Ratko, YU1NR, continues to be active as V29NR. Recent spots show most of his activity being on 17 meters. Try 18115 kHz at 1510 and 1700 to 1730z. Also check 24951 kHz around 1600z. QSL via YU1NR.

CENTRAL KIRIBATI. Ron, ZL1AMO, reports his T31RW trip has been moved back until around April or May 1995.

HAITI. Missionaries HH1D and HH1T are Darlene, KB8CTC, and husband Tim, KB8CTD. They operate between 14260 and 14350 kHz around 2200z and 7288 kHz at 1000z running a TS-450S from a solar charged battery system.

IRAQ. YI9CW has applied for authorization to operate on 30 meters.

THAILAND. DL2VK will be signing HS0/DL2VK for about 6 months. Most activity will be CW, though packet, AMTOR, PacTOR and SSB may be used.

HEARD ISLAND. Tony, WA4JQS, plans ahead. He is working on obtaining permission to visit the island in 1997. Until then he and WA8JOC, WD8SDL and W90EH continue work on refurbishing 3Y0PI antennas.

UNITED ARAB EMIRATES. Don, WB2DND, should be in Dubai from November 11 to 16 and operate A61AD. Most operations will be early mornings and late evenings with Don having to do so around his work schedule. Check 160 and 80 meters around 0200z. He has a sked with WA2UDV and N1QMM on 14240 kHz at 2100z and takes calls afterwards. QSL via WB2DND.

TONGA. Paul, KK6H, should be on the air as A35RK from November 24 to February 7. Most operating will be CW on 160 through 30 meters. QSL his home CBA w/SASE.

MARIANA ISLANDS. Listen for JA2NQG signing AH0F on CW until November 6. JA2NVY is also along operating both CW and SSB as AH2CW/KH0. JI2UAY signs KH2GV/KH0 on 29 MHz FM. QSL via their home calls.

THIS WEEKEND ON THE RADIO. 2100z Saturday will usher in the 61st annual ARRL November Sweepstakes CW contest, which runs to 0300z November 7. Work as many US and Canadian stations as possible exchanging the classic Sweepstakes exchange information of serial number, power class, call sign, check number and ARRL Section.

The HA QRP Contest, sponsored by the Hungarian ARS and Radiotechnika Magazine, runs through 2400z November 7, from 3500 to 3600 kHz CW only. Use 5 watts or less output power. Exchange call sign, signal report, QTH and name. Both call signs and full exchanges must be sent and received by both stations.

International Police Association Radio Club contest, sponsored by the US Section of the IPA, is from 1800z to 2200z November 5 for CW, and 1800z to 2200z November 6 for SSB. Exchange signal report and serial number. US IPARC members will add IPA after serial number.

The Ukrainian DX Contest, sponsored by the Ukrainian ARL and Ukrainian Contest Club, runs 1200z November 5 to 1200z November 6. In this SSB and CW event, exchange signal report and serial number. Ukrainian stations will send signal report and two letter region abbreviation.

Details on all of these operating events appear on pages 125 and 126 of October QST.

<How can anyone complain about the monetary charges of VE's? Maybe
<those that do should learn a bit more about the history of
<examinations and be thankful that they no longer have to deal directly
<with the FCC. VE's are exactly that..volunteers.....if it weren't for
<this type of system amatuer radio would definitely die out. My fee was
<exactly \$4.75.....for access to an interest that will last a
<lifetime..not to mention 10 yrs.....\$0.475 a year is one helluva deal.

<KE4RWQ

I totally agree. I just took and passed my Tech exams and I very much appreciate the time the VE's take to perform this important function. There's a fair amount of paperwork involved as well and my VE's were polite and helpful the whole time. I think we should all tip our hats to the VE's, the small fee they charge is one of the best bargains you'll ever find.

Tom (waiting for his callsign!)

Funny, how someone who considers themselves such a free thinker has to resort to belittling others to make a comment that they may think is funny. Let me tell you, being insulting is not funny. If you don't like people who have trouble spelling, that's just fine. If you don't like people in the NRA, that's just fine too. If you don't like people who have a problem with those who broadcast a sexual preference like it was some bright red badge to be worn, that's just fine too. But since you don't like these people because they are outspoken about how they feel and what they believe, and don't hold back for some bullshit high-minded notion, you give them hell.

Let me tell you something, at least these people have the GUTS to admit how they feel, and don't bow down to some crap that they have to be nice to everyone who comes along. The bottom line is everyone is different and we will always have differences, and at least some people will stand up for what they believe.

I'll tell you straight out; My spelling aint so hot, I'm a member of the NRA, and I (in all honesty) am not too fond of gay people. In other words, you insulted me, I don't appreciate it, and for all I care, you and your liberal bullshit can rot in hell .

Oh, by the way, get off your high horse, anyone who thinks they are "very intelligent" usually is an idiot (as proved by your post).

And at least I've got the BALLS to say it (which is a lot less I can say for most folks)

Aha... that explains the hook in my mouth. I thought international fishing
had to keep 12 miles offshore. Yeah, I know, some fish jump right into the
boat...

Anyway, on the topic of Maws Coad, what kind of key should a beginning ham
get? I've got a code practice oscillator, and I could use that as a straight
key. What is the difference between the iambic keys and the "bug" keys? I'm
getting the impression that the bug isn't used much these days, is that right?

Subject: Re: FCC new license processing time...

Recently recieved my license as well....

Test Date Sept. 13

Effective Date Oct. 18

Postmarked Oct. 24

Received Oct. 27

That was 6 weeks and 2 days. I'm not sure why the effective date is a week
before the postmark. Do you really think it took the FCC a week to get it into
the mail?
